

1. 1 plate: \$2.50

3 plates: $\$2.50 \times 3 = \7.50

They paid \$7.50 altogether.

2. 4 pillow cases: 6.6 m

1 pillow case: $6.6 \text{ m} \div 4 = 1.65 \text{ m}$

She used 1.65 m of lace for each.

3. $1.8 \text{ kg} + (2.05 \text{ kg} \times 3) = 1.8 \text{ kg} + 6.15 \text{ kg} = 7.95 \text{ kg}$

The 4 packages weighed 7.95 kg.

4. $\$5.65 + (\$1.45 \times 6) = \$5.65 + \$8.70 = \$14.35$

She spent \$14.35.

5. 2 people: \$6.70

1 person: $\$6.70 \div 2 = \3.35

$\$15.35 - \$3.35 = \$12$

Alice had \$12 left.

$(\$2.20 - \$0.85) \div 3 = \$1.35 \div 3 = \0.45

Each pencil cost \$0.45.

$(3.46 \text{ m} \times 3) + 4.25 \text{ m} = 10.38 \text{ m} + 4.25 \text{ m} = 14.63 \text{ m}$

She used 14.63 m of material.

8. 4 apples: \$2.20

1 apple: $\$2.20 \div 4 = \0.55

$\$0.60 - \$0.55 = \$0.05$

An apple is \$0.05 cheaper at the sale.
